

Profile

Experienced RPA Developer with demonstrated skills in Software Development and leadership. With more than 5 years building end-to-end automations, starting from process discovery and analysis to solution deployment and support.

I am a dependable asset to the team, always punctual and determined to get the job done. I never waiver in my contribution to my team as I am always ready to help my co-workers to achieve the end result.

I am a quick study with a dedication to keep learning and improving on what I know. Being highly organized and detail-oriented makes it easier to manage my own time for the success of the team.
